

Algorithm 1. Rhyme verification of a Klon-Paed poem (`check_klon`).

Require: poem T with waks separated by whitespace; type $k \in \{4, 8\}$

Ensure: list of rhyme errors (empty $\Leftrightarrow$ poem is valid)

- 1: $W \leftarrow$ split T into waks, grouped into stanzas of four
- 2: **for** each stanza (w_1, w_2, w_3, w_4) **do**
- 3: $S_i \leftarrow \text{SSG}(w_i), i = 1, \dots, 4$ {syllables}
- 4: **for** each rule $\rho \in \{\text{r1}, \text{r2}, \text{r3}, \text{rX}\}$ **do**
- 5: $(a, B_\rho) \leftarrow$ source syllable and target set of rule ρ
- 6: **if** no $b \in B_\rho$ satisfies $\text{IS_SUMPUS}(a, b)$ **then**
- 7: record an error for rule ρ
- 8: **end if**
- 9: **end for**
- 10: **end for**
- 11: **return** the list of errors
